EDUCATION

University of California, San Diego

Bachelor of Science in Data Science

San Diego, CA

Sept. 2023 – Jun 2027

EXPERIENCE

Software Engineer Intern

Amazon

June 2024 – Sept 2024

San Diego, CA

- Proposed and experimented with changes to the Amazon cart page to enhance user experience.
- Implemented an easily viewable version of the page to improve user interaction and satisfaction.

Software Engineer Intern

Amazon

June 2025 – Sept 2025

San Diego, CA

- Led the deprecation of a backend service and migrated its functionality into a more efficient service.
- Streamlined system architecture, reduced network latency, and improved overall platform performance.
- Implemented a new button on Amazon's Grocery Cart Conflicts Page designed to increase average cart size and reduce cart abandonment.

Software Engineer Intern

Amazon

June 2026 – Sept 2026

Austin, TX

- Expanded the use of Amazon's backend agentic chatbot for grocery operations, enabling it to answer queries using real-time pricing data across Whole Foods locations.
- Improved reliability of Amazon's bulk pricing infrastructure by investigating failures in price update processing and designing, monitoring, and alerting, mechanisms for incomplete pricing operations.

UCSD Track and Field Athlete

UC San Diego

Sept 2023 – Present

San Diego, CA

- Compete in collegiate triple jump events while balancing academic and professional commitments.
- Train 15–20 hours weekly, developing discipline, resilience, and time-management skills.
- Collaborate with coaches and teammates to achieve performance goals and represent UCSD in meets.

PROJECTS

Girls Basketball Scorekeeping App | *React Native, JSX*

August 2021 – June 2022

- Designed and developed a mobile application for live basketball scorekeeping supporting up to 13 players
- Implemented real-time tracking of team scores, fouls, and player statistics using component state management
- Built a multi-screen interface including home, directions, player setup, live scoring, and standings views
- Created a responsive, scrollable UI optimized for mobile devices

Recipe Rating Prediction System | *Python, Pandas, NumPy, scikit-learn, Git*

March 2025 – June 2025

- Built a scalable data processing and machine learning pipeline on 800K+ records, improving prediction performance by 63% through feature engineering and model tuning

Interactive Climate Risk Visualization | *D3.js, JavaScript, Python*

May 2026 – June 2026

- Built an interactive data visualization platform modeling projected sea-level rise and flood risk across 12 U.S. coastal cities through 2100
- Processed and aggregated climate projection datasets in Python and developed dynamic D3.js visualizations with scenario selection, timeline controls, and city-level analytics
- Integrated multiple sea-level projection sources to communicate climate outcomes under different emissions pathways

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS, JSX, Pandas, NumPy, scikit-learn

Frameworks: React Native, JUnit

Developer Tools: Git, VS Code, IntelliJ

Libraries: pandas, NumPy
